

# Ing. Marek Šútora

**Date of birth:** 28.4.2000

**Address:** Mlynská 229/17, Malé Uherce 958 03, Slovakia

**Email address:** marek.sutora@gmail.com

**Web:** mareksutora.sk

## Work Experience

---

09.2024 – 12.2025

Žilina, Slovakia

### **.NET Developer** **Codium s.r.o**

- Development and maintenance of backend **microservices** that **process betting data** from multiple providers and **expose this data** to the frontend via REST API or gRPC, where users can place betting tickets.
- **Collaborate** with **team members**, as well as **frontend developers** and **DevOps engineers**, to ensure smooth integration and deployment of new features.
- **Backend** and **frontend** work on an internal **backoffice** web application.
- Development and maintenance of internal **NuGet packages** shared across multiple services to ensure code consistency and reusability.

Microservices Architecture, C#, .NET, .NET framework, ASP.NET Core, MS SQL, Entity Framework, Dapper, Kafka, Redis, SignalR, REST, gRPC, jQuery, Elasticsearch & Kibana, Prometheus & Grafana  
+ TeamCity (CI/CD), GitLab, Jira, Confluence

07.2022 – 06.2024

Žilina, Slovakia

### **Software Developer Intern** **Descartes Systems (Slovakia) s.r.o.**

- Part of a team working on a project focused on processing and visualizing **real-time telematics** data.
- Implementation of many features on an **interactive map** with various **animations** and **markers**.
- Implementation of various **charts**, **tables**, and **graphs**.
- **Agile environment** following the **SCRUM** methodology, participating in **daily stand-ups**, **sprint planning**, **retrospectives**, and **two-week sprints**.

Frontend: JavaScript, HTML, CSS, MapLibre, C#, Razor Pages

Backend: Microservices Architecture, C#, ASP.NET Core, MS SQL, Dapper, REST  
+ Azure DevOps Server (CI/CD, GIT, User Stories, Bugs)

## Education

---

2022 – 2024

Žilina, Slovakia

### **Informatics | Master's degree** **Faculty of Management Science and Informatics and - University of Žilina**

## Additional Information

---

My main focus is programming and software development, both on the frontend and backend, with experience in various technologies and tools in both areas. On the backend, I am most proficient in C# and the .NET ecosystem, while on the frontend, I prefer using the React library and the Next.js framework. However, I believe I can quickly adapt and learn to work with any technology.

I have experience working in a team and with agile software development. I consider myself to be a reliable and hardworking person with a responsible approach to work and learning.

In my free time, I enjoy working out, listening to music, watching TV series, movies, and various types of sports. I also like reading non-fiction, and occasionally I play some computer games.
